100+ Projects for Engineering College Students

1. Automatic Visitor Counter using Arduino
2. RFID Authenticated Device Switcher system using Arduino
3. Alcohol Sensing Display with Alarm using Arduino
4. RFID Based Exam Hall Ticket Authentication System using Arduino
5. Rain Sensing Automatic Car Wiper using Arduino
6. Remote Stepper Motor Controller System using Arduino
7. Arduino based Line Following Robot
8. RFID Based Attendance System using Arduino
9. Arduino based Smart Dustbin System
10. Ultrasonic Blind Walking Stick using Arduino
11. Sun Tracking Solar Panel Using Arduino
12. Programmable Robotic Arm Vehicle using Arduino
13. Arduino based Alcohol Sense Engine Lock System
14. Rain Detection based Automatic Clothes Collector System using Arduino
15. Weather Reporting System using Adruino
16. Motorized Solar Scarecrow Bird Animal Repellent using Arduino
17. Arduino based Stepper Motor Controller
18. Secure RFID based Bank Locker System using Arduino
19. Smart Room Temperature Controller Fan using Arduino with user defined settings
20. Automatic Unauthorized Parking Detector using RFID Tag

21. Arduino based Accident Identification and alerting System using GPS and SMS Alert
22. LPG Gas Accident Prevention with SMS Alert using Arduino
23. RFID tag Operated Vending Machine using Arduino
24. Automatic Drawing Machine using Arduino
25. Women's Safety Device With GPS Tracking & Alerts using Arduino
26. Wireless Joystick Controller for Robotics using Arduino
27. Automatic Coil Winding Machine using Arduino
28. Obstacle Avoiding Robot using Ultrasonic Sensor
29. Gesture Control Bluetooth Speaker using Arduino
30. Programmable Pick and Place Robotic Arm Using Arduino
31. Arduino based Ultrasonic Sonar/Radar System
32. Arduino based UV (Ultra Violet) Disinfection Box
33. Dry Hand washing Machine By Fog Disinfection To Save Water using Arduino
34. Solar Powered Water Trash Collector Robot using Arduino
35. Intelligent Gas Leakage Detector Using Arduino
36. Arduino Based Autonomous Fire Fighting Robot
37. Health Monitoring System using Arduino
38. Ultrasonic sensor based Automatic Car Parking System using Arduino
39. Arduino based Circuit Breaker System
40. Advanced Footstep Power Generation System using Arduino

100+ Projects for Engineering College Students

41. Arduino and GSM Based Fire Alerting System
42. RFID and Mobile OTP Based Bank Locker System using Arduino
43. Arduino based Irrigation Monitoring & Controller System
44. RFID Vehicle Starter System using Arduino
45. Rough Terrain Battle Robot using Arduino
46. Arduino based Fire & Gas Accident Avoider System
47. GPS Vehicle Tracking & Theft Detection system using Arduino
48. Automated Car Parking With Empty Slot Detection using Arduino
49. Vehicle Movement Street Light With Light Sensing
50. Arduino based Patient Health Monitoring System
51. Smart Solar Grass Cutter System
52. Hand Gesture Controlled Robotic Vehicle/Car using Arduino
53. Arduino based Garbage Monitoring System
54. GSM based Patient Health Monitoring System using Arduino
55. Soldier Health & Position Tracking System using Arduino
56. Arduino based Liquid Level Monitoring System
57. GSM based Industry Protection System (Fire, LPG, Flame, Heat)
58. Black and White Box Sorting Machine using Conveyor Belt
59. Programmable Wire Cutting Machine with Length and Quantity Setting (CNC Machine)
60. Programmable Pick and Place Robotic Arm (Manual and Automatic Mode selection)

100+ Projects for Engineering College Students

61. Colour sensor based Automatic Sorting Machine using Arduino (CNC Machine)
62. Automatic Dry and Wet Garbage Segregation Bin
63. Android App Based River Cleaning Robot
64. Arduino based Touch less Dustbin using IR Sensor
65. Automatic Water Bottle Filling Machine using Arduino
66. Android App based Robot using Arduino and Bluetooth
67. Automatic Water Bottle Filling Machine using Conveyor Belt System (CNC Machine)
68. Automatic Weight Based Sorting Machine using Conveyor Belt (CNC Machine)
69. Movable Android App Based Touch less Dustbin
70. Android App based Fire Fighting Robot
71. Arduino based Solar Powered Farm House
72. Arduino based Automatic Railway Level Crossing System
73. Self-Lifting Smart Bridge using Arduino
74. Vehicle Exhaust Monitoring System using Arduino
75. Arduino based Height and Distance Calculator
76. On Road EV Charging System Using Arduino
77. Arduino based Water Quality Monitoring System
78. Solar Powered Vehicle Exhaust Monitoring System using Arduino
79. Arduino based Air Quality Monitoring System
80. SMS based Watt and Ampere Meter using GSM and Arduino

100+ Projects for Engineering College Students

81. Arduino based Room Temperature and Humidity Monitoring System
82. Arduino based Transmission Line Fault Detection System
83. EV Battery Overheat Monitoring system with auto Cutoff based on Arduino
84. Arduino based Elevator Control System with Overload Alert
85. Bluetooth based Home Automation system using Arduino
86. Arduino based Over Voltage and Under Voltage Protection System with Auto Load cutoff
87. Women's Safety Device with GPS Tracking and SMS Alert
88. Eye Blink sensor based automatic Car Engine Locking System
89. Solar Powered Car parking System using Arduino
90. Arduino based Elevator Control System
91. Accelerometer based Orientation Tracking System using Arduino
92. Advanced Laser Security System with SMS Alert
93. Arduino based Digital Clock using RTC
94. IR Sensor based Wireless Data Transmitter System
95. Arduino based EVM machine
96. Arduino based Machine Overheat Detector with Auto Load Shut Off
97. Arduino based Tacho Meter or Speedometer
98. Metal and Non-metal Garbage Segregation system using Conveyor Belt
99. Self-Balancing spoon for Parkinson's sufferers
100. Automatic Load Sharing of Transformer by using Arduino
101. Dual Axis Solar Tracker using Arduino
102. Mars Rover Robot using Arduino
103. DC Motor speed control using Arduino
104. Metal and Non-Metal Box Sorting Machine using Conveyor Belt
105. Smart Energy Saver with Bidirectional Visitor Counter using Arduino
106. Arduino based Elevator Control System

Check out my YouTube channel for more projects and ideas.
