Engineering College Projects WITHOUT Arduino

Check out my YouTube channel for more projects and ideas.

Channel Link: @scienceprojectsandexperiments

1. Automatic Street Light using LDR
2. Solar Powered Automatic Street Light
3. Laser Security System
4. Float Sensor Based Water Level Indicator
5. Tesla Coil with Arc Generator
6. Rain Alarm System
7. IR Sensor Based Fire Alarm System
8. LPG Sensor Based Gas Leakage Alarm System
9. Wireless Energy Transfer System
10. Mutual Inductance Experiment
11. Piezo Sensor Based Vibration Alarm System
12. IR Sensor Based Obstacle Avoidance Detector System
13. Hand Gesture Control Bulb On-off System
14. Float Sensor Based Automatic Water Pump On-off System
15. Brushless DC Motor Design using Reed Switch
16. Brushless DC Motor Design using Hall Sensor
17. Single Motor Based Walking Cart
18. Gearless Linear Transmission Mechanism
19. Solenoid Engine Mechanical Project
20. Home Automation using Radio Frequency (RF) Technology
21. Home Automation using Infra Red (IR) Technology
22. Orested Law Experiment
23. Invisible Laser Boundary Wall

@scienceprojectsandexperiments

24. Solenoid Electric Bell System
25. Remote Control Bulb using TV Remote
26. Hand Gesture Control Fan
27. Handheld Metal Detector
28. Smart Touch less Water Dispenser
29. Solar Mobile Battery Charging System
30. Wind Energy Based Mobile Battery Charging station
31. On Road EV Vehicle Charging System
32. Zero Friction Braking system Mechanical Project
33. Alcohol Indicator with Alarm system
34. Solar Powered Air Cooler
35. Lemon Battery Experiment
36. Li-Fi Audio Transmitter and Receiver System
37. Solar Powered Irrigation system
38. Flywheel Energy storage Mechanical Battery
39. Regenerative Braking in EV
40. Hydraulic Car Lifting System
41. Mechanical Hydraulic Crane
42. Solar Powered On Road EV Vehicle Charging System
43. UV Water Sterilizer System
44. Classification of Water on the basis of Electric Flow
45. MOSFET Based DC to AC Inverter
46. Clap Controlled On-off Bulb
47. Optical Fiber Communication System
48. Footwear based Energy Harvesting System
49. Sensor Alert to Stop Trains from Hitting Animals
50. Motorized Vegetable cutter Machine

@scienceprojectsandexperiments

51. Vertical Wind Turbine based Battery Charger
52. Solar Powered Farm House
53. Sand Filter Machine Mechanical Project
54. Digital Code Lock System
55. LED-Based Emergency Light
56. Automatic Water Pump Controller
57. Portable Solar Power Generator for Mobile Phone
58. Human Presence Control Security Light and Alarm
59. Automatic Smoke Detector Alarm
60. Object Counting Using 7 Segment Display
61. Timer Circuit using 555 IC
62. Digital Stop Watch
63. Digital Rain Alarm system
64. AND, OR , NOT gates using Transistors
65. Digital Soil Moisture Tester using LM3915
66. Digital Counter Circuit using 7 Segment Display
67. Digital Scoreboard
68. A Simple Wireless Switch using 433Mhz RF Module
69. Hydraulic Bridge working model using Syringe
70. LPG Gas Leakage Detector with automatic Exhaust Fan On
